Art Unit: 1616

***Election Requirement***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-8,89,90,114,122, drawn to a composition comprising essential oil, classified in class 514, subclass 357.
- II. Claims 24-39,42,44-48,91,117, drawn to a method of applying essential oil onto plant foliage, rhizosphere to control pathogenic organisms, classified in class 514, subclass 357.
- III. Claims 70-76,78-86,96-99, drawn to a method of applying essential oil to an area in order to control insects, classified in class 514, subclass 357.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for all Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1616

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
